REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the PTO-892 each disclose a track count method for an optical disc in an optical disc system.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest a track count method for an optical disc in an optical disc system, the optical disc system comprising an optical pickup moveable along a radial direction of the optical disc, a light source installed on the optical pickup for emitting light and a plurality of sensors installed on the optical pickup for emitting light, and a plurality of sensors installed on the optical pickup for detecting light reflected from the optical disc, the method comprising: using the light source to emit light towards the optical disc; using the sensors to detect light reflected from the optical disc; generating a tracking error (TE) signal based on the light received by the sensors while the optical pickup moves along a radial direction of the optical disc; generating a tracking error zero crossing (TEZC) signal based on the TE signal; generating a peak detecting (PD) signal based on the TE signal; **generating a pseudo radio frequency zero crossing (RFZC) signal based on the PD signal; and generating a track count signal based on the TEZC signal and the pseudo RFZC signal.** (bold language emphasized).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Paul Huber at telephone number 703-308-1549.
